

<b>Technological Education Service Procedures</b>	
<b>Adopted:</b> October 6, 2010	<b>Last Reviewed/Revised:</b> January 6, 2025
<b>Next Scheduled Review:</b> -2027-2028	
<b>Associated Policies &amp; Procedures:</b> <a href="#">III-14 Employee Code of Conduct</a> <a href="#">V-07 Requests to a School or to the Board</a> <a href="#">VI-06 Charitable Receipts</a> <a href="#">I-21 Corporate and Community Investment in Education</a> <a href="#">VI-85 Corporate and Community Investment in Education</a>	

## Purpose

To provide schools involved in Technological Education programs, with procedures to increase accountability regarding supports to these programs, and finance and administration of these programs.

## Application and Scope

This procedure applies to all Technological Education programs, that are provided by the Halton Catholic District School Board (HCDSB). This procedure must be used, with appropriate accompanying forms, when service or product is provided to staff or community members through the area of Technological Education.

## Definitions

Technological Education, 2009 is a Ministry of Education support document that defines program requirements in Technological Education in the areas of Transportation Construction, Green Industries, Hairstyling, Hospitality, Woodworking and any other area as determined by the HCDSB that meets the criteria outlined in the document.

## Principles

HCDSB recognizes:

- the importance of providing appropriate training, knowledge and skills to students in the area of Technological Education
- the teaching and application of theory through a “hands on” instructional methodology where possible in Technological Education programs
- the stewardship of using the raw materials, or materials manufactured from raw materials, with all its programs

## Requirements

- At the start of each year, Secondary School Principals should make staff and the community aware that services are available through Technological Education Courses (e.g. staff meeting, school website).
- Staff or other community members may request service or products prepared by students, under the supervision of a teacher. (See Appendix A).
- The Principal and the Department Head of Technological Education, in consultation with teachers, will decide if services or products requested by staff or community members are safe and appropriate for student work. Only work that meets these criteria will be approved.
- Requests for services or products supplied must be pre-authorized by the Technological Education Department Head and/or course teacher so that projects complement the course curriculum and maximize the number of students able to work on that project. Services requested by Principals and/or Vice-Principals, valued in excess of \$100.00, must be approved by the Family of Schools’ Superintendent. Refer to *HCD SB Policy III-14 Employee Code of Conduct*.
- Staff and community members do not pay for any labour costs associated with any work/service they have requested.
- Staff and community members must pay for all parts and supplies associated with meeting their requests. An estimate must be provided prior to the commencement of the job. An itemized invoice, made in triplicate, must be submitted to the staff or community member, by the Technological Education Department Head and/or course teacher upon completion of the service or product provided. A copy of the invoice is kept by the Technological Education Department Head and/or course teacher and the school’s Financial Clerk. (See Appendix B & C).
- Staff and community members who supply their own parts and/or products will not be charged except for any additional shop supplies that are used to complete the work, including any environmental or disposal fees (e.g. oil/filter, etc.).
- Staff and/or community members must provide payment to the school for products/services rendered upon completion of the service or provision of the product. This amount must be received by cheque only and made payable to the secondary school where the work was completed. All payments should be submitted directly to the school Financial Clerk.

- The Principal of the school will ensure that payment is deposited in the school's appropriate school budget account promptly after receipt of payment. If staff and/or community member wants to make a cash donation to the school, this should be deposited into the school's "School Generated Funds" account.
- A monthly summary report of financial activity related to courses providing services/products will be provided to the Family of School Superintendent upon request.

**Donations and Sponsorship:**

Non-cash donations, also known as gifts-in-kind (e.g. vehicle donations) could be made to a Technological Education Program, and the donor may request a tax receipt if the donation has a value of \$100 or more. Any donation of \$1,000 or more must be appraised through an independent external appraiser at the expense of the donor. Donations valued at \$10,000 or greater must receive HCDSB approval to be accepted. Refer to *Policy V-07 Donations Bequests to a School or to the Board, Procedure VI-06 Charitable Receipts* and *Procedure VI-85 Corporate and Community Investment in Education*.

Donations of service, i.e. time, skills, effort (which are not property) do not qualify as an eligible tax donation.

Sponsorships made to Technological Education Program valued at less than \$10,000, require the approval of the Director of Education or the Superintendent of Business Services. Sponsorships valued at \$10,000 or more, must receive approval from the Board of Trustees.

**Use of Machinery, Equipment & Materials Purchased/Owned by the School:**

The use of machinery, owned and purchased by the HCDSB, may only be done with written permission of the Principal and used on the school/HCDSB site. Failure to acquire the necessary permissions makes the user liable for any loss, theft or damage to the machinery or products. (See Appendix D).
