

HALTON CATHOLIC DSB SCHOOL BOARD VENTILATION PROFILE

School boards are optimizing air quality in schools through improved ventilation and filtration. Implemented measures are dependent on the type of ventilation and feasibility within the context of school facilities and related building systems. This is a key element in the multiple protective strategies being employed to reduce the risk of COVID-19 transmission and support healthier and safe learning environments for students and staff.

MEASURES TO HELP REDUCE TRANSMISSION RISK IN INDOOR SETTINGS

Ventilation: Increasing the flow of outdoor/fresh air for diluting the concentration of any infectious particles.

Filtration: Involves the use of different types of fibrous media designed to remove particles from the airstream.

SCHOOL BOARD VENTILATION STRATEGY

- Continue best practice maintenance with a focus on equipment that impacts indoor air quality and increase air filtration to MERV 13, where possible.
- Increase outside air flow to occupied space where possible and run ventilation systems 2 hours before and after occupancy to flush buildings daily.
- Rebalance HVAC systems to maximize ventilation air into occupied spaces.
- Use Portable HEPA air cleaners in high risk areas identified by the Ministry of Education.

HALTON CATHOLIC DSB School Board Ventilation PROFILE

SCHOOL BOARD WIDE INVESTMENTS

2020-21 School Year

Ventilation Funding* | \$4.8M

2021-22 School Year

Ventilation Funding* | \$3.1M

40

Ventilation projects completed

14

Ventilation projects in progress / planned

48

Schools receiving an investment, which is 86%
of total schools in the board.

14

Schools to receive an investment, which is 25%
of total schools in the board.

Note: *This includes includes spending from dedicated ventilation programs, federal-provincial funding, provincial renewal funding and supplemental funding from other board sources.

STANDALONE HEPA FILTER UNITS DEPLOYED | 249

HALTON CATHOLIC DSB SCHOOL BOARD VENTILATION PROFILE

Select your school here

School Name	St. Nicholas CES
--------------------	------------------

Ventilation System	Mechanical Ventilation
---------------------------	------------------------

School Ventilation and Filtration Measures*

Ventilation assessed	✓
Running ventilation systems longer	✓
Higher grade filters installed	✓
Increased frequency of filter changes	✓
Increased fresh air intake (windows and/or mechanical ventilation systems)	✓
Standalone HEPA** filter units deployed in portables, as needed	Not Applicable
Standalone HEPA filter units in place	5

*Some measures may not be feasible within the context of a school facility/site and related building systems.

**High-Efficiency Particulate Air (HEPA)
